The European HVO (Hydrotreated Vegetable Oil) market has seen significant growth over the last 5 years, with more and more oil majors, such as Neste, Total, ENI and dedicated fuels producers alike are continuing to invest heavily in HVO production units. With the continued focus on reducing GHG and CO2 emissions both in Europe, and around the globe, the demand for more sustainable fuels has never been higher. However with increasing competition from Asia and the US, the need for sustainable feedstock, technological adaptation, increasing regulatory pressures, price fluctuation, and the need for more investment in R&D show that the industry is facing some significant challenges.

Already in its 13th edition of a very successful series, the Oleofuels 2020 conference will bring together senior representatives from the biodiesel, renewable diesel and HVO industries to discuss the latest market advancements, developments & business opportunities.

Who will be attending?
- Biodiesel producers
- HVO/HEFA producers
- Downstream oil companies/HVO producers Researchers
- Process technology providers
- Catalyst companies
- Fuel Traders/Brokers
- Consultants
- Crop science/feedstock companies/plantation owners
- Governments Representatives
